DecaFlow Animal Management System

for use with Lago X and Lago

spectral
instruments
imaging

DecaFlow Animal Management System allows for easy, efficient 20 mouse management with increased efficiency and accurate animal positioning. Quickly swap trays for non-stop imaging!

Get Prepped While Imaging

A heated benchtop tray and manifold allow 10 mice to be positioned and prepped while a 2nd tray of 10 mice is being imaged.

DecaFlow System Includes

Two 10 mouse manifold trays and two docking stations for instrument and heated benchtop. For use with Lago and Lago X Imaging Systems.
